

What makes AXiO Health Group unique

Here are some of the reasons corporations and individuals chose AXiO Health Clinic and AXiO Physiotherapy and Sport Medicine Clinic downtown Montreal and that make AXiO unique:

Our expert skills

- Drawing on their vast experience with Montreal's professional sports teams and performing arts companies such as FC Montreal, the Alouettes, les Canadiens and the Rocket hockey clubs, AXiO physicians and therapists are optimally suited to coordinate annual health assessments and wellness programs for their clients.

Our interdisciplinary approach

- Trained as family physicians, AXiO'S physicians are also experts in sport medicine and emergency medicine. Our health professionals provide an interdisciplinary approach, applying elite sport medicine concepts whether it be for injury prevention or for physical rehabilitation and for return to work, activity or sport for individuals of all ages and abilities.

We put the accent on health education and knowledge transfer to our clients, helping them achieve their health and wellness goals related to work, sport or activities of daily living.

- AXiO is an interdisciplinary health center where your company will find under one roof, a health clinic (with family physicians and specialists and emergency trained nurses), a physical activity and sport medicine clinic (with sport medicine physicians, physiotherapists, osteopaths, massage therapists, nutritionists and psychologists) as well as an Ear, Nose and Throat Clinic.

We invite you to visit our website at www.axiohealth.com to learn more about our team and services.

Our personalized experience

- At AXiO we provide a more personalized medical service in a timely and efficient manner as we are a boutique clinic. As a result, there are less clients per physician and more time accorded for each medical and therapy visit.

- AXiO's physicians continue to work in the public health care system and many are responsible for clinical teaching at the McGill University Health Network. AXiO's physicians also have developed well established and close professional working relationships with their specialist colleagues, all to the benefit of our patients.

Our medical service model aims to combine the advantages of the public and private health care systems to bring optimal care to AXiO patients.

With work from home being the norm now, AXiO offers expert services in occupational health related to office ergonomics including companywide video-conferences on this topic as well as individual consultations in person or via tele-conference.

Our competitive offer

- Our health evaluations are offered exclusively under the direct supervision of an AXiO physician. These health evaluations are offered in complementarity with a very personalized medical service during the year between annual health assessment visits.

Why AXiO is unique

- The AXiO advantage lies in the quality of our health and wellness annual evaluations tailored and adapted to our clientele.
- There are no additional fees for follow up visits with our nurses and doctors. These visits, whether in person or via tele-medicine, are covered by public health insurance under RAMQ.
